Your Excellency,

**OFFERING FULL SCHOLARSHIPS, SUBSIDISED AND FEE-PAYING SCHOLARSHIP(S) FOR
PARTICIPATION IN SEAMEO VOC TECH HYBRID REGIONAL TRAINING PROGRAMME ON
EMBRACING SUSTAINABILITY: INTEGRATING GREEN PRACTICES INTO TVET CURRICULUM**

6 – 8 October (Online) &

13 – 17 October 2025 (Onsite – UTM, Kuala Lumpur, Malaysia)

Warm greetings from SEAMEO VOC TECH Regional Centre for Technical and Vocational Education and Training, Brunei Darussalam!

We are pleased to inform Your Excellency that the SEAMEO VOC TECH Regional Centre will be conducting the Regional Training Programme on **EMBRACING SUSTAINABILITY: INTEGRATING GREEN PRACTICES INTO TVET CURRICULUM** on **6 – 8 October 2025 (Online) & 13 - 17 October 2025 (Onsite – UTM, Kuala Lumpur, Malaysia)**. By fostering a culture of sustainability, this programme contributes to the global movement towards achieving the United Nations Sustainable Development Goals (SDGs), particularly Goal 4 (Quality Education) and Goal 13 (Climate Action). It empowers educators with the necessary tools and strategies to align TVET with emerging green workforce demands, ensuring that future professionals are equipped to contribute to sustainable development.

This training programme is offered with three funding options: Full Scholarship, Subsidised and Fee-Paying. SEAMEO VOC TECH is pleased to offer **one (1) Full Scholarship** to a TVET Curriculum developer/educator. For other interested Ministries, Institutions and Industries whose nature of business is relevant to the above training, SEAMEO VOC TECH is also offering a **Subsidised and Fee-paying participation** to enroll in this programme.

Handwritten signature

For more explanation on the classification package, please see the table below.

COMPONENT	FULL SCHOLARSHIP	SUBSIDISED	FEE-PAYING
Training Fee US\$550.00	SEAMEO VOCTECH	SEAMEO VOCTECH	Respective Ministry/ Institution
Airfare		Respective Ministry/ Institution	
Accommodation (twin-sharing room)			
Daily Allowance			
Travel Insurance			
Immigration & Visa Processing			
Transportation (Airport, Hotel, Training Venue)			
Lunch & Refreshments (AM & PM)			SEAMEO VOCTECH

In this regard, SEAMEO VOTTECH Regional Centre would like to seek Your Excellency's kind support and assistance in socialising this information to the relevant stakeholders and to nominate qualified participants as per the following requirements:

1. The target participants for this training programme are TVET Curriculum developers and educators.
2. They should have a minimum of 5 years of service remaining.
3. Any Full Scholarship alumnus who has attended our Regional Training Programmes before at SEAMEO VOTTECH can only apply again for a similar course THREE YEARS after the date of their last attended course.
4. The participant should be proficient in English as the course will be conducted and communicated in English.
5. They should have adequate computer skills.
6. They should have the capacity to carry out the action plans that they will develop.

Enclosed are the **Course details (Appendix 1)**, **Nomination Form** and **CV Template** to be completed by the nominee(s). It would be highly appreciated if the completed forms could reach us by or before **22 September 2025**. For further enquiries and information, please contact Ms Noorhayati Cynthia Abdullah (Course Coordinator) at cynthia.haizamdin@vottech.edu.bn or Nur Haidatul Fatinah (Training Officer) at haidatul.marzuki@vottech.edu.bn.

Thank you very much for Your Excellency's kind assistance and support of this programme and we look forward to receiving Your Excellency's nominations soon.

"Inclusive TVET for a Green and Digital Future"

Yours sincerely,

[HAJI NORJEMEE BIN JENEK]

Director

Course Outline

Hybrid Regional Training Programme on EMBRACING SUSTAINABILITY: INTEGRATING GREEN PRACTICES INTO TVET CURRICULUM

6-8 October 2025 (Online) &
13-17 October 2025 (Onsite - UTM, Kuala Lumpur, Malaysia)

Rationale

The transition towards a greener economy necessitates integrating sustainability principles into Technical and Vocational Education and Training (TVET) curricula. As industries adopt environmentally friendly practices, TVET institutions must equip learners with the competencies to support and drive sustainable initiatives. This regional training program aims to build the capacity of TVET curriculum developers and educators to embed green skills and sustainability concepts within TVET curricula.

Through this 8-day training, participants will develop a clear understanding of sustainability principles and their relevance to TVET; identify key green skills and competencies required in various TVET sectors; explore best practices and strategies for integrating green skills into TVET curricula; design curriculum frameworks incorporating sustainability and green practices; and develop action plans for mainstreaming green education within their institutions.

By fostering a culture of sustainability, this programme contributes to the global movement towards achieving the United Nations Sustainable Development Goals (SDGs), particularly **Goal 4 (Quality Education)** and **Goal 13 (Climate Action)**. It empowers educators with the necessary tools and strategies to align TVET with emerging green workforce demands, ensuring that future professionals are equipped to contribute to sustainable development.

Objectives

Specifically, by the end of the 8-day training, participants will be able to:

- explain the importance of sustainability and green skills in TVET;
- analyse existing green practices in their respective countries and institutions;
- apply curriculum development strategies to integrate sustainability concepts into TVET programmes;
- utilise innovative teaching and learning approaches to deliver green education effectively; and
- formulate strategic action plans for institutionalising green practices in TVET.

APPENDIX 1

Contents

Module 1: Introduction to Sustainability in TVET

This module provides an overview of sustainability in global and regional contexts, emphasising the role of Technical and Vocational Education and Training (TVET) in promoting sustainable development. Participants will explore key policies and frameworks that support green TVET, gaining insights into the integration of sustainability principles within educational institutions and workforce development strategies.

Module 2: Green Skills and Competencies for TVET

Participants will identify key green skills required across different sectors and analyse the case studies of successful green skills integration in TVET programs. Discussions will focus on the challenges and opportunities in embedding sustainability within TVET, helping educators and curriculum developers recognise practical approaches for addressing these challenges in their own contexts.

Module 3: Strategies for Integrating Green Practices into TVET Curricula

This module explores curriculum development approaches for embedding green skills into TVET programs. Participants will engage with innovative teaching and learning methods that foster sustainability education. A hands-on curriculum development workshop will provide a platform for participants to design sustainability-infused curriculum modules, ensuring practical application of the concepts covered.

Module 4: Country Presentations on Green TVET Practices

Participants will showcase country reports on Green TVET practices through 5-8 slide presentations, sharing insights into their national strategies and institutional initiatives. The session will include peer reviews and discussions to highlight best practices, facilitate knowledge exchange, and encourage participant collaboration.

Module 5: Case Studies and Practical Applications

An in-depth exploration of exemplary institution case studies will provide participants with real-world insights into effective green TVET implementation. This will be followed by a hands-on curriculum development workshop, where participants apply lessons from the case studies to develop actionable curriculum components aligned with sustainability goals.

Module 6: Industry Engagement and Educational Visit

Participants will visit a local institution or industry-recognised for its strong sustainability practices, offering first-hand exposure to real-world applications of green skills in the workforce. The visit will be followed by a reflection and discussion session, allowing participants to analyse key takeaways and consider how these best practices can be adapted to their institutions.

APPENDIX 1

Module 7: Developing Institutional Action Plans

This module provides guidelines for designing institutional action plans, equipping participants with tools and strategies for integrating Green TVET in their respective institutions. Group work will focus on formulating actionable strategies, with opportunities for peer feedback and expert consultations to refine their plans for effective implementation.

Module 8: Presentation of Action Plans and Closing

Participants will present their institutional action plans in the final module, showcasing their strategies for integrating sustainability into TVET curricula. The training will conclude with a consolidation of key takeaways, reinforcing the importance of sustainability in TVET and ensuring that participants leave with concrete steps for implementation.

Duration

This regional training programme runs for 8 days: 3 days Online (6-8 October 2025) and 5 days Onsite/Face-to-face (13 – 17 October 2025).

Delivery Method

Structured in two delivery modes: Online and Onsite, this training programme will make use of the following teaching methods and activities:

- Interactive Lectures & Webinars – Expert presentations on sustainability and green skills in TVET
- Workshops & Group Discussions – Hands-on activities to develop curriculum materials
- Case Studies & Best Practices – Analysis of successful green TVET models
- Country Presentations – Peer sharing of current sustainability practices
- Industry/Educational Visit – Practical exposure to green implementation in TVET
- Action Planning – Formulation of concrete strategies for implementation
- Problem-Based Learning (PBL) – Addressing real-world sustainability challenges in TVET
- Peer Review & Reflection – Encouraging collaborative learning and feedback

Expected Output

By the end of the training programme, participants are expected to produce the following outputs, namely:

- Country presentations (5-8 slides) on existing green practices in TVET curricula.
- A draft curriculum framework incorporating sustainability elements.
- Action plans for integrating green skills into TVET curricula at the institutional or national level.
- A repository of best practices, case studies, and teaching-learning materials on green TVET.

APPENDIX 1

Target Participants

The participants in this training programme are 20 TVET curriculum developers and educators from SEAMEO-member countries. They should have prior experience in curriculum development and a commitment to integrating sustainability into their respective institutions.

Course Requirements

1. Participants of this training programme are expected to bring their laptops and copies of their curricula.
2. They must submit:
 - Country presentations (5-8 slides) on “*Issues and Challenges in the Integration of Green Practices in their TVET Curriculum-*” by the 10th of October 2025, prior to onsite training.
 - Draft curriculum and action plan no later than 1 week after the end of training, by the 26th of October 2025.
