# The most compact A3 scanner that reliably handles mixed batches and large sizes

The fi-7460 scans A4 landscape documents at 60 ppm/120 ipm (200/300 dpi) and can load up to 100 sheets at a time.

#### Assistance for safe and reliable scanning

The fi-7460 possesses diverse stable paper feeding mechanisms, with its brake rollers functioning as its fundamental mechanism to separate each scanned document. Minimize risk of document damage with stable paper feeding that Paper Protection function provides through its detection of anomalies in sound and monitoring of paper feed distance. And bid farewell to missing edges with the scanner's Skew Reducer mechanism. Potential information loss, resulting from multiple sheets being fed through the scanner at once, is also no longer an issue with Ultrasonic Multi-feed detection.

#### Boosted workflow with various functions

The scanner is capable of scanning a wide variation of documents: A8 to A3 documents and plastic cards as well as thick folded A2 documents, drawings folded in half, multi-layered receipts, and envelopes by switching between Manual/Single mode. Load documents with ease and reduce your workload before and after scanning, with the scanner's

independent side guides helping you align edges of variously sized documents. Keep track of scanner operations and scan up to 50 previously registered jobs, using the LCD operation panels. The Stacking Control function, a key stable paper feeding mechanism, also assists in controlling paper output speed and makes sure that documents are ejected neatly. Operation of all these functions is fairly simple and ensures users with efficient workflow assistance.

#### Advanced software for maximized efficiency

Bypass the inconvenience of making fine adjustments to OCR settings with the PaperStream IP scanner driver, supporting both TWAIN and ISIS. The software automatically converts scanned images into exceptionally clean images, supporting OCR accuracy even when scanning documents with background patterns or wrinkled and soiled documents. Seamlessly linked to PaperStream IP, PaperStream Capture effectively and efficiently feeds information into your organization workflow with its various batch scanning capture features. Automatically utilizing data extracted from barcodes and patch codes, the software also determines your preferred saving destinations and eliminates time allocated to routine tasks.

### RICOH fi-7460

#### Technical Information

Scanner Type	ADF (Automatic Document Feeder) / Manual Feed,	
	Duplex	
Scanning Speed		
(A4 Landscape)	Simplex: 60 ppm (200/300 dpi)

\*1 Scanning speeds may vary due to the system environment. For details, please visit our website at: https://www.pfu.ricoh.com/global/scanners/fi/. \*2 Indicated speeds are from using JPEG compression.
\*3 Indicated speeds are from using TiFF CCITT Group 4 compression. \*4 Selectable maximum resolution may vary depending on the length of the scanned document. \*5 Limitations may apply to the size of documents that can be scanned, depending on system environment, when scanning at high resolution (over 600 dpi). \*6 Capable of scanning documents longer than A3 (297 x 420 mm / 11.7 x 16.5 in.) sizes. When using PaperStream IP (TWAIN/ISIS) to scan at 200 dpi, the maximum scanning length is 5,588 mm (220 in.). \*7 Capable of scanning up to 3 cards at a time. (Note: does not set more than one embossed card at a time.) \*8 Maximum capacity depends on paper weight and may vary. \*9 Numbers are calculated using scanning speeds and typical hours of scanner use, and are not meant to guarantee daily volume or unit durability. \*10 Intelligent Sonic Paper Protection. \*11 Excludes the ADF paper chute and Stacker. \*12 fi Series scanners do not run with Windows\* 11 and 10 ARM-based PCs. \*13 Functions equivalent to those offered by PaperStream IP may not be available with the Image Scanner Driver for Linux or WIA Driver. \*14 Refer to the fi Series Support Site for driver/software downloads and full lineup of all supported operating system versions. supported operating system versions.
